Maths Scholars

Creative Arts-Dreams and Aspirations

Working with our primary and secondary school colleagues, exciting programmes have been developed for our primary scholars. Selected pupils are invited because they excel in Mathematics, English and Science. Alternatively, students may be selected because they demonstrate aptitude in subjects such as Drama, Dance, Physical Education, History, Languages, Outdoor Education, Public Speaking, Leadership and more. Award ceremonies take place with parents involvement to recognise scholars achievements and efforts. Strong links have been established between our family of schools. The impact of each programme is analysed and measured through parent, pupil and staff voice.

Sustainability Projects
